

My Portfolio

Based on products launched in the past 5 years

Vaping Devices

Vuse GO

Led the multi-country launch of disposable vaping products across 8 markets: Croatia, Slovenia, Bosnia & Herzegovina, Serbia, Montenegro, Albania, North Macedonia, and Kosovo.

Timeline: March 2022 – August 2022 (5 months to market)

Budget: €12M+

Coordinated cross-functional teams (marketing, trade, legal, regulatory) across all countries. Aligned regional deployment strategy for summer high season execution. Managed supply chain timelines to ensure simultaneous launch readiness. Drove market-specific adaptation while maintaining brand consistency.

Impact:

- Successful synchronized product launch in all 8 countries.
- Created retail visibility and trade momentum during peak consumption period.
- Strengthened brand presence across a diverse regulatory landscape.

Vuse Pro

Introduced a rechargeable closed vaping system (Vuse Pro) in Croatia and Serbia for the first time, expanding the product portfolio with a premium and innovative device using interchangeable pods.

Timeline: June 2023 – December 2023 (6 months to market)

Budget: €3M+

Oversaw full market entry planning, from product registration to commercial deployment. Worked closely with digital, retail, and consumer engagement teams to educate on device functionality and flavour range. Defined go-to-market strategy tailored to each country's competitive and regulatory environment.

Impact:

- Contributed to a 14% market share growth in the first 6 months.
- Established a strong base of early adopters and retailers for the brand.

Vuse Go Reload 1000

Delivered the first launch of rechargeable vaping devices in Bulgaria and Romania with the Vuse Go Reload Pen & Box 1000 and Vuse Pods.

Timeline: January 2024 – August 2024 (7 months to market)

Budget: €2M+

Managed end-to-end project lifecycle in two complex markets with varied compliance and trade challenges. Adapted activation toolkit and training for on-ground commercial teams. Ensured alignment between regulatory approvals and go-live dates.

Impact:

- Achieved a 32% increase in market share in the first year.
- Positioned the brand as an early mover in the closed system segment in both markets.

Heated Products

glo hyper+

Led the launch of glo hyper+, a next-generation heated tobacco device, in two key Southern European markets: Spain and Portugal, focusing on adult smoker conversion and brand differentiation in a highly regulated environment.

Timeline: April 2021 – October 2021

Budget: €3.2M

Collaborated with legal, R&D, and marketing teams to secure product approvals and prepare all customer-facing materials in local languages. Managed pilot programs in Lisbon and Madrid, tracking user conversion, feedback, and retention.

Impact:

- Achieved 8% market penetration within the first 6 months post-launch.
- Positioned the brand as a viable alternative to traditional tobacco, especially among tech-savvy urban consumers.
- Helped build a foundational user base and retail distribution footprint for future device iterations.

glo hyper pro

Oversaw the regional debut of glo hyper pro, the most advanced device in the glo lineup to date, designed with superior heating technology. Croatia and Serbia were chosen as pilot markets due to their strong performance and consumer feedback.

Timeline: January 2024 – June 2024

Budget: €2.5M

Orchestrated a full-funnel launch strategy including influencer partnerships, omnichannel campaigns, and trade marketing activations. Piloted a “test & convert” program to drive early device trials in key urban zones. Conducted market research and post-launch tracking to guide iterative improvements.

Impact:

- Helped to reach 30% of heated tobacco category share in Croatia within 6 months; 25% in Serbia.
- Recognized internally as the company’s fastest-adopted product launch in the region.
- Built a replicable blueprint for future high-tier product introductions in similar markets.
